High Quality Card Printing

NISCA card printers combine state of the art technology and outstanding engineering with a perfect handling concept.

User friendly operation, high speed production and excellent printing performance distinguish these professional card printers.

Optional additional modules allow for example also to encode a magnetic stripe and a smart card or to apply an additional protective overlay after printing.

NISCA PR 5300

The first Printer of the new 53 Series is designed as a desktop machine for smaller applications. But anyhow the PR5300 also was successful in many large projects. The PR5300 offers NISCA Quality at a very interesting price. Rugged quality through solid workmanship guarantee hassle free and economic card production. Easy and comfortable operation results in brilliant card printing quality.

NISCA PR5310

The NISCA PR 5310 contains all the advantages of the PR5300, but offers optional a wide range of encoding options. You can order the PR5310 with Magstripe,- contact smartcard,- and contactless smartcard encoding options. With this printer you are prepared to offer a perfect printing and encoding System.

NISCA PR5350

Externally and as far as user friendliness is concerned, the PR5350 looks very similar to his "smaller brothers". He offers like the PR5310 optional contact and contactless encoding possibility. But the flagship of the NISCA printer series is internally equipped with a revolutionary high performance printing mechanism. It is one of the fastest printer in his class.

NISCA printers - flexible universal machines for perfect card quality.
