Quick and Easy Personalization of XXL-passes on two different card sizes

Our special printer P310 XXL Dual-Size, based on the proven Zebra Card Printer P310, was introduced specially for ticketing and accreditation purposes.

It allows quick and easy personalisation of different sized large badges, as are used for example in sports and music events.

Preprinted XXL- cards sized 124,8 x 87,8 mm or 140,0 x 87,8 mm (center printing) can be personalized within an maximum area of 86,0 x 54,0 mm individually.

The recommended print area is 82,0 x 51,0 mm. Visitors are issued convenient, large size badges, which can be worn by means of a lanyard, in a matter of seconds.

The proven print engine prints the individual part with a resolution of 300dpi within max. 25 seconds either monochrome or in full color.

The self-cleaning cartridge removes dust and debris, guarantees immaculate printing, and protects the print head.

Optionally, the inline encoding of contactless chips is possible.

Small size, easy handling, durable design and therefore minimum maintenance effort make desk-top operation simple and efficient with this special printer.

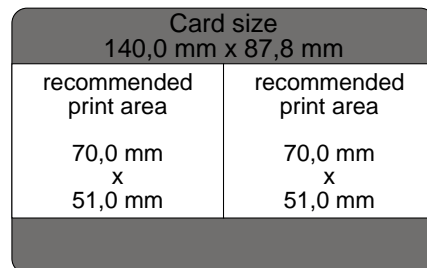

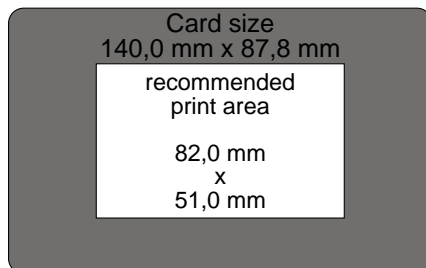

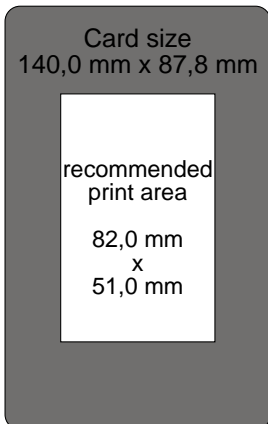

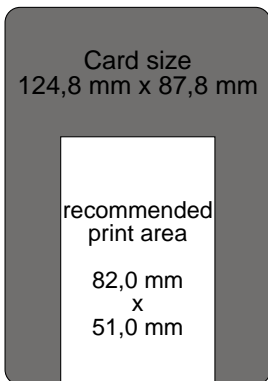

P310 XXL Dual-Size - The specialist for special events.
